

GroundCloud's industry-leading Train-the-Trainer program is an intensive, five-day, multi-disciplinary course which employs final mile specific content to help candidates meet Qualification Certification standards. It produces well-rounded Safety Specialists, not simply driver trainers.

The Train-the-Trainer program will qualify your candidate to fully train drivers, with detailed instruction on how to turn a delivery novice into a truly professional driver.

### EACH CLASS OFFERS

A professional corporate safety plan that provides structure to your organization and a document to present to FXG to ensure compliance while expanding or protecting your business.

Training in commercial final mile vehicles, such as sprinters, P1000s, and 15 foot box trucks.

Professional Lead Trainers that will teach your Certified Trainer candidates how to effectively train your drivers on safe driving and parking techniques.

// *"Great Class. Great instructor. I liked that my instructor is also a FedEx Ground contractor. He understands all sides of the spectrum with an amazing knowledge of the Industry as a whole."*  
-Greg Miller JZ Logistics

*"The course is very educational and professional. The instructors were great - seriously professional and supportive. I had great experience and learned good techniques for leading my future safety training with new and existing drivers."*  
-Rumen Panayotov Manuwest Inc.

*"Great course! Solid objectives, well organized, repeat themes. I not only learned the material, but how to present the material. Something for drivers of all experience levels."*  
-Bruce Bergman A&L Delivery

When you sign up for Qualification Certification training with GroundCloud, you receive a "bonus class!" This free, additional course will include topics such as:

- Understanding the safety contract
- SRI & SRS review and how this impacts FXG's CSA score
- Leadership skill set overview
- Creating and maintaining a corporate safety culture
