

GroundCloud Pro is a more advanced version of our flagship CSP manager platform. This revolutionary set of features is designed to help final mile delivery contractors optimize and automate their operations. The new product significantly improves their bottom line, at a time they need it the most.

GroundCloud Pro takes delivery business operations to the next level with profit optimization analytics, payroll automation, detailed vehicle maintenance and asset tracking, and other new modules that will drive efficiency and profitability for users of this platform.

“Delivery contractors are facing pressures on multiple fronts, including surging fuel costs and acute labor shortages. GroundCloud Pro delivers several tools that drive efficiency and boost profitability to its users.”

David Leland Founder/CEO of GroundCloud

Operations Optimization

The RouteStats™ module provides dashboards for contractors to quickly understand the state of their business operations and identify areas of operating inefficiency. RouteStats helps owners meet delivery demand with the right amount of resources, consistently avoiding over or under scheduling of assets and labor. Eliminating excess expenses will result in greater profit margins.

Payroll Automation

GroundCloud Pro helps delivery contractors simplify their payroll with automated timekeeping and payroll reports. Users are able to create custom payment structures for their teams that can be sent directly to their payroll processor. This eliminates the need to create manual spreadsheets or pay payroll consultants.

Centralized Workflow

Enhanced vehicle and maintenance tracking, fleet-wide messaging, timekeeping, scheduling, and payroll automation are all integrated in one portal. No more wasted time hopping between apps and paying different vendors for various services required to run a delivery business. GroundCloud Pro does it all.

Includes everything in GroundCloud CSP (Standard tier), PLUS the following advanced features and modules:

FLEET MANAGEMENT

- Data Exports
- Recurring Vehicle Reminders
- Fleet-Wide Text and Video Announcements
- Renewal Reminders
- Mobile Asset Tracking

PROFIT OPTIMIZATION

- RouteStats™ (Productivity, Efficiency, and Utilization Metrics)
- Accurate Planning Based on Market Trends
- Route Recommendations
- Multi-Business and Multi-Terminal Insights
- Driver and Team Performance Review
- Business Performance by Day of the Week

PAYROLL AUTOMATION

- Combined Per Stop and Hourly Pay
- Customizable Payment Models per Employee
- Customizable Overtime Configurations
- Export to Major Payroll Systems (ADP, Paychex, Quickbooks, etc)

SCHEDULING SUITE

- Enhanced Driver and Route Scheduling
- Updated Clocked Shifts
- Improved Timecard Approvals Workflow
